

Desktop Alerting Solution for the education sector

V5 out now!

NetSupport Notify is a simple, low-cost, one-way alerting and mass notification tool that enables an administrator to communicate instantly with desktop users or unattended public information displays across any size or type of school.

From a desktop, laptop, tablet or smartphone, deliver attention-grabbing notifications (that can't be hidden, ignored or saved for later) to selected users/systems, specific departments or all connected users. Alerts carrying varying priorities, customisations, audibility and delivery options can be distributed across the school in seconds - each with an accurate, real-time record of receipt and acknowledgement.

NetSupport Notify can be installed and operational in a matter of minutes and evaluated within your school via our free 30-day trial download.

Key Features

- Send alerts to Windows, Mac, Chromebooks and Linux desktops
- Send from Windows, Android or Apple iOS device
- Apply priority levels to alerts
- Deliver messages to 5000 users (including departments)
- Send full screen messages to unattended devices (e.g. digital public information screens)
- Messages can't be skipped, ignored or saved for later
- Customise alerts with your school branding
- Include audible alerts
- Support for clickable URLs within alerts
- Real-time message preview
- Hotkey support in 'Emergency Response' scenarios
- Schedule alerts in advance
- Works across multiple networks (send messages to IP ranges)
- Central reporting and tracking
- Restrict access with security codes
- Manage config via Active Directory
- Plus much more!

Education Use

Schools are fast realising the benefits of using mass notification solutions such as NetSupport Notify to boost school communication and support their emergency and lockdown procedures, using one-way alerts and notifications.

Key Benefits:

Save time

NetSupport Notify delivers messages (that can't be skipped or ignored) to selected/all staff and students in a single action (across multiple platforms) - saving precious time in the case of more urgent alerts. It also allows routine alerts (such as fire drills or routine IT system downtime) to be pre-scheduled for a fixed time and date. Plus, it does not require regular management of contacts, making it a quick and easy solution to use.

Emergency and lockdown communication

NetSupport Notify can be a vital communication tool during a school's emergency and lockdown procedures - and some integrate it as an official part of their emergency plans due to its ability to send a clear and concise message to all connected computers. Plus, administrators can create and use ready-made "emergency response" alerts, and send them from the office or on the move with our dedicated mobile apps.

Evidence of acknowledgment

Each message can carry a priority level from routine student/staff communication to technical alerts or even a critical emergency - and a request for acknowledgment. All delivered messages are recorded centrally with full delivery/receipt logging and the ability to export a summary for future analysis.
