Rebuilding children's confidence in maths  
and English at home and in school

# How Doodle works

1

## Download on any device at home or school

Pupils can access all learning from a single mobile phone — ideal for school closures. Doodle's work programmes synchronise automatically between devices so a pupil's learning is always up-to-date.

2

## Proxima™ – Doodle's in-built AI

Doodle continually assesses a child's strengths and weaknesses, identifying gaps in their knowledge and assigning personalised work at just the right level.

3

## Pupils practise for 10 minutes a day

Available at all times, our programmes employ a 'little and often' approach to personalised learning. In just 10 minutes a day, children can catch up and get ahead in maths and English.

4

## Features for teachers and parents

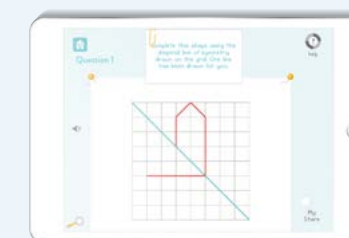

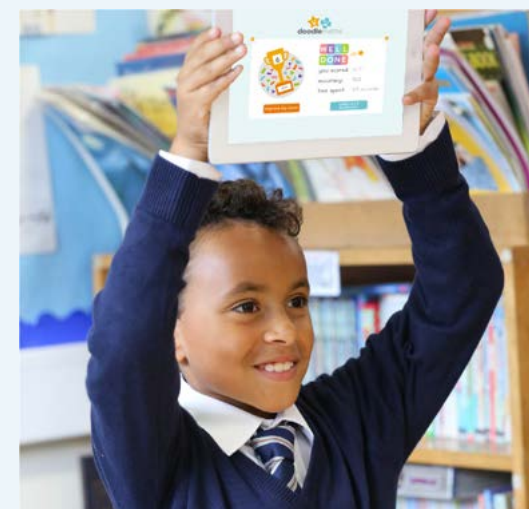

A detailed online dashboard tracks and monitors progress, meaning no marking or planning for teachers. Parents can also download a free app to engage with their child's learning.

5

## Improved confidence and ability

Children engage positively through our careful balance of challenge, reward and growth mindset. A boost in confidence and ability is guaranteed.

Paul Tullock  
@MrTullock

I love @DoodleMaths it's unbelievable and tailors to each child. They get daily questions, you can set lessons and there's great multiplication resources to help visualise and conceptualise. Plus the customer service and support is great too.

— Twitter review from teacher Paul Tullock

"DoodleMaths has made our remote learning provision so much richer and less stressful for us as teachers, knowing that every child has access to an individual programme of learning across numeracy and literacy. The children are benefiting daily!"

— Julie, teacher at Carrick Primary School

## DoodleMaths subscription

DoodleMaths

+

DoodleTables

Fully aligned to the national curriculum for maths across EYFS, KS1, KS2 and KS3.

## DoodleEnglish subscription

DoodleEnglish

+

DoodleSpell

Covers the grammar, punctuation, spelling and comprehension curriculum for KS1 and KS2.

Subscriptions include a dedicated school account manager, full training for teachers, unlimited learning for children, and online support for parents.

Prices start at just £6 per pupil per year.

“I have to say it’s been absolutely brilliant during lockdown as a remote learning resource. I would argue it’s been the most successful home learning resource for our school in terms of a week-on-week increase in pupil engagement.”

— J Gibbins, teacher at Addington School
