

Making sense of SPaG

The finer points of spelling, punctuation and grammar are tricky to learn and often even trickier to retain.

Our individual work programs change this, leaving teachers free to unleash creativity in the classroom.

Aligned to national curriculum for SPaG and comprehension.

DoodleEnglish

DoodleSpell

“It is genuinely adapting to their needs... content is pitched perfectly for each child”

Graham Andre
Lanesend School

Innovative, personalised learning technology

Our carefully authored content introduces difficult SPaG concepts kindly, and our adaptive technology, Proxima™, ensures it's only introduced when children are ready - and that it is revisited sufficiently to be retained.

DoodleEnglish

Whilst necessary, teaching children the finer points of fronted adverbials can be dry at the best of times! What's more, even after a successful lesson, these grammatical rules can be very difficult for children to retain.

DoodleEnglish moves children gently and progressively through carefully-authored questions designed to teach children the fundamentals of punctuation and grammar, as well as vital comprehension skills.

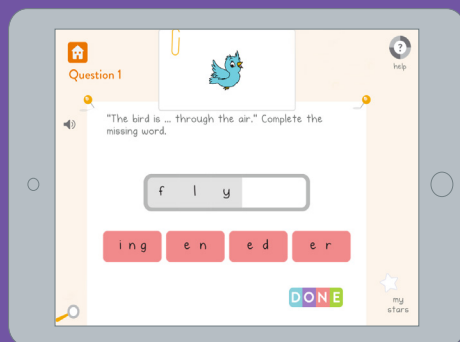

The 7-a-day functionality is brought across from DoodleMaths and implemented in a hugely effective way, constantly reminding children of what they have previously learned: you'll be able to drop terms like 'adverb' into your lessons, safe in the knowledge that such fundamentals are understood by your class and won't need revisiting during the lesson.

Proxima™

We know that children don't always choose what's best for them. So, in the instance that a teacher hasn't set work for the child, our intelligent algorithms determine what they will learn when they open the app. By assessing their ability across all areas of the curriculum, individuals work at exactly the right level of challenge to guarantee progression.

DoodleSpell

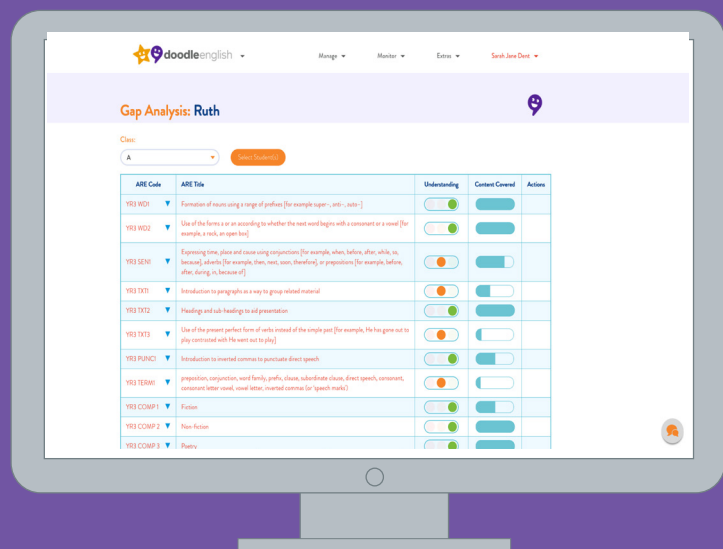

Move beyond “Look, Cover, Write, Check”! With DoodleSpell, Proxima™ will construct a personalised spelling program for each individual child in your class, based around their own strengths and weaknesses. If you want to set specific word lists, you can create these through the teacher dashboard and they will appear in the app: children will immerse themselves in learning them through a huge range of different question styles.

A subscription to DoodleEnglish automatically includes access to DoodleSpell. Alternatively, you can subscribe to DoodleSpell independently.

Teacher Dashboard

Teachers and parents can see instantly what work each child has covered. We benchmark against the national curriculum for Spelling, Punctuation and Grammar, providing a traffic light system that can pinpoint each individual's level of understanding. From the teacher dashboard, you can also set your own content, including custom word lists for DoodleSpell.

'The Doodle team continue to provide a top level of service to their users, whether they are parents or teachers.'

Marie Jackson
Whitehills School

The right team to deliver innovative learning

DoodleEnglish and DoodleSpell utilise the same core technology that underpins the hugely popular DoodleMaths - the best-selling maths application in the UK for the last four years.

School subscriptions come with a dedicated account manager with direct experience of working in a school environment. We work alongside schools to ensure that our products are fully embedded, and that maximum value is obtained year-round.
