Classroom, Home & Roaming

We are positive disruptors. We are pioneers. We are LearnBox.

LearnBox is reinventing education and training through the creation and delivery of high quality video content.

We believe the best ideas are born outside of the classroom. As fearless leaders in the sector, we hold our learners at the heart of our business and provide an alternative method of learning. One that's not confined by classroom walls or time restraints. We strive to make the learner experience engaging, enjoyable and beneficial, which is reflected through outstanding results (Our pass-rates are well above the national average!).

Our content is hosted on our multi-functional and flexible Learner Management System (LMS), which has a range of advanced features and abilities including unlimited storage, to allow for a full and unrestrained learning experience.

We are actively investing in the skills of the future, supplying learners with the support they need to love learning

## Learners:

"The courses themselves run on from each other, so being able to complete module to module is very easy."

- Adam Fisher, Team Leader, Jaguar Land Rover E.M.C.

"I enjoyed the videos so much that I have nearly finished the course! They are very funny, it is like watching TV. I feel like it has improved my English already"

- Sergiu Borza, 39. Adient, Speke

## Customers:

"LearnBox has the most entertaining and engaging teaching material of any online platform we have used."

- Thomas Jeavons, Head of Operations, Skill Centre Ltd

"LearnBox has meant we have been able to reach out to a lot more employees than we would have done before."

- Kelly Dolphin, Recruitment and Development Manager, Atalian Servest

## Who We Are and What We Do:

The origins of Learn Box were focussed on Apprenticeship programmes and we have full programmes for **Level 2** Performing Manufacturing Operations, Performing Service Operations, Business Improvement Techniques, Customer Service; **Level 3** Team Leadership; **Level 5** Operations Management with Adult Care Worker 3 and Business Administration 2 currently underway.

As part of these programmes, we also have full courses for Functional Skills Maths & English, British Values, Prevent and Employee Rights & Responsibilities.

Functional Skills English – 97% first time pass rate

Functional Skills Maths – 90% first time pass rate

Functional Skills English and Maths – 100% second time pass rate

Having been very successful with our Functional Skills Maths & English, we have now completed similar programmes for GCSE Maths and English Language. These programmes for GCSE provide a framework around which teachers and tutors can plan their entire lesson programme for the year and also provides available homework packages for the year and revision material prior to GCSE Exams.

The learning experience is appealing interactive and enjoyable and full supports and compliments classroom teaching. Our learning management platform means learners can fully complete work online or offline and at the time of their or their employers choosing (eg. On the bus to work, production/office breaks, end of shift, etc) and assessors can also assess online. This means those natural 'dead' times in a working day can be used to cover the 20% Off-the-Job and also tutor/assessors can increase their 'learner load' by at least 50% and spend less time travelling to locations.

Tutor/assessors can see at a glance the time students are spending on their course work or other assignments, the progress they are making and the areas where they are struggling. This allows the tutor to focus quality time only where it is most needed, otherwise leaving learners to get on at their own pace.

The programmes can also be used within classroom time for student self-learning, particularly where the teacher may want to provide one to one attention to some particular students.
