

Case Study

THE BRITISH INTERNATIONAL SCHOOL
KUALA LUMPUR
A NORD ANGLIA EDUCATION SCHOOL

BSKL has over 1,000 students covering Early Years, Primary and Secondary, including Sixth Form. It follows a globally respected curriculum based on the English National Curriculum and thinks beyond traditional education to transform learning.

Mr Stewart, Computing Lead and Teacher at British International School of Kuala Lumpur.

The challenges around the online safety area

The challenges are keeping planning and resourcing as well as our own subject knowledge constantly up to date in an ever-changing environment. It can also be a challenge to design engaging and detailed lessons on the subject of online safety.

Why Gooseberry Planet

Gooseberry provides a comprehensive and detailed system of work which is constantly up to date with the issues our children currently face online. Resources are provided both for staff, children and parents to ensure the whole school community can understand staying safe online together. The Gooseberry planet platform also provides engaging online activity that makes the children want to learn about how to keep safe!

The Impact

Currently just in our first term of teaching but the impact has been consistent teaching across each year group of the lessons. Also, the feedback from both teachers and students has been excellent.
