

## DOWNLOADABLE EDUCATIONAL ACTIVITIES AND LEARNING PRESENTATIONS FOR EYFS – PRIMARY AND CHILDREN WITH SPECIAL EDUCATIONAL NEEDS READY RIGHT WHEN WE NEED THEM.

“Applefortheteacher.co.uk are a team with dedication, passion and a common goal; to put the love in learning. They take fun seriously, recognising the need for all children to be enthused in their education, providing educators with the necessary tools to ignite every child’s natural curiosity.

They design the highest quality educational resources for schools, teachers and home educators, giving instant access at the touch of a button to child friendly printable activities and presentations. They strive to inspire and enthuse learning for children and really do help to reduce the rapidly growing workload for teachers. But not with more of the same...

As a Special Education Teacher, I have struggled to find high quality resources to suit the needs of all the learners I teach, as we all know, one size definitely does not fit all. However, at applefortheteacher.co.uk I have found a whole range of activities which I am now using daily, to inspire and engage the children I work with. It is a very organised website which is very easy to navigate and the resources are helpfully split into Year groups, with a section specifically for special educational needs, unlike other educational websites where a lot of time can be wasted trying to find age or ability suitable resources.

The activities are extremely imaginative, stimulating and inviting for the children who use them and they link easily to pre-key stage objectives and the current National Curriculum, saving time for a busy teacher. The PowerPoint presentations are unique, interactive and fun and are, without a doubt, the best I have seen on any educational website. They have definitely helped me with my teaching and inspired the children in my class to actually love learning allowing them to make progress in a much more exciting way.”

*Jan Settle, teacher of Special Educational Needs, West Yorkshire*
