magicbooking

Automate *Admin, Bookings and Payments*

Clubs, Trips, School Dinners, Parents Evenings, and Wraparound Care

magicbooking.co.uk

magicbooking

Your **one-stop solution**

Automate
admin tasks,
bookings,
payments,
and
send communication,
all from one place.

Manage your **clubs, trips, school dinners, parents evenings** and **wraparound care.**

Core Features

Fully Cloud-Based: *magic*booking is securely hosted on Microsoft Azure Cloud, so you don't have to worry about servers or installing and upgrading software.

Responsive Solution: Available on any operating system and on all devices including smartphones.

24/7 Online Booking: Improve service accessibility for parents and reduce manual input, so you can focus on more important tasks.

Standalone or Integrated: *magic*booking can be used as a standalone system or integrated with your school MIS.
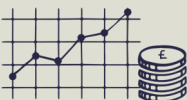

Discount Capability: Easily set-up and automatically apply discounts for siblings, FSM, pupil premium and staff.

Automated Document Generation: Invoices, credit notes, daily registers and statements are automatically generated.

Customisable Booking Rules: Define booking notices, discounts, payment terms, payments options and more, on a per activity/session type (clubs, trips etc.) basis.

Debt Control: Monitor debts by setting overdraft limits, enforcing payment at the point of booking or use our automated instalment feature to reduce debt levels.

Admin Privileges: Manage staff positions and access, including the ability to log in as a parent to make bookings on their behalf.

Late Booking Capability: Enable admins to add children to same-day registers to help you keep track of late booking invoices.

Multi-Session Capability: Accurately manage the availability of two, three or more session times, including overlapping sessions.

Payment Options: Select from a wide range of options such as card, standing order or childcare voucher/TFC. Request payments at the point of booking or by automated instalments to bring flexibility while reducing debts.

Multi-Site Capability: Ideal for academies, the mutli-site capability allows management teams to access data from all schools in the academy, including extended financial reporting while limiting data access to one or more schools for other staff members.

Communication: Easily communicate with all or a targeted list of parents via email and SMS, to send reminders or alert them about an exceptional closure or incident.

Easy Data Access: All information about a child's EHCP, emergency contacts, dietary requirements, and more, all available from one place.

Extensive Reporting Capability: Easily access debt reports, occupancy levels, income per allocation codes, projected income and more.

"**magicbooking has been terrific for the Pegasus Academy Trust. It's saved us a lot of time and a decent amount of money as well**"

J. Roberts, Company Chief Executive Officer and Executive Principal Pegasus Academy Trust

Clubs

Plan ahead and streamline the booking process for all your extra-curricular clubs!

magicbooking manages live availability based on both bookings and cancellations received. Booking confirmations and invoices are automatically generated and sent by the system to the relevant parent and kept on record.

Keep parents informed via email or SMS about available clubs, and allow them to book one or more children at a time.

magicbooking allocates the money paid to the relevant club, increasing financial transparency.

Trips

Whether you organise day trips or residential ones, **magic**booking can help you run things smoothly. For residential trips, you can let parents make partial payments until the full payment deadline, so that they can spread the cost over several months.

The communication module allows you to contact parents throughout the period leading up to the trip, reminding them about payment deadlines or important information about the trip.

"...our service has developed significantly since the introduction of this booking system by freeing us from endless paperwork and therefore allowing us to focus on providing the best care for the children"

Andrew Norton,
The Curvepoint Group Director
EnergyKidz

School Dinners

Make school dinners a piece of cake with **magic**booking. When integrated with your school MIS, the system picks up all pupils from your school and applies meal charges according to entitlement.

magicbooking school dinner module comes complete with a till view, saving on additional hardware cost and maintenance, and provides a daily count of meals to be prepared and actually served.

Parents Evenings

Organising parents evenings can prove chaotic if you don't have **magic**booking to manage slot availability. In addition to saving a lot of headaches, calls and queries to admin staff, **magic**booking offers a modern and slick booking option that automatically generates real-time attendance lists according to bookings.

"The helpdesk team are very good at looking into all of our requirements and responding within an acceptable time frame or if things cannot be solved straight away, they keep us updated"

Judith Priest, Senior Communities Officer Aylesbury Town Council

Wraparound Care

Facilitate your childcare provision management by offering a modern self-serve solution to parents that automates document generation from booking confirmations and invoices, through to statements and daily registers.

All of these time-consuming admin tasks are taken care of by **magic**booking, freeing up staff time.
