simple

Improvement planning and progress analysis tool

Improvement Hub is an easy-to-use school improvement website helping schools become good and outstanding. It helps you manage any kind of Improvement Planning; whether you're creating Whole School Development Plans, Improvement Plans, Actions Plans, Governing Body Action Plans or Subject Leader Plans.

Improvement Hub links seamlessly with Inspection Coach. Whilst you are in the act of Self Evaluation, Improvement Hub will suggest improvement plan actions. These actions are specifically targeted to meet key elements of the new OFSTED Inspection Framework.

Key features

- **A flexible and easy to understand dashboard** so the whole team can immediately see the status of an action plan.
- **Enter you own plan** or copy your existing improvement/action plans into the system. Then use automatically suggested actions based on your self-evaluation answers.
- **Effortlessly monitor plans** that are key to the school improvement process, including: key members of staff, subject leader plans, governor action plans and overdue/ at risk plans.
- **Your plans can be accessed on any device at any time** and printed out in a way that is familiar to your staff – ideal for subject leader working parties or governor subcommittee meetings!

Excellent customer service and a great product. I would definitely recommend."
